

DESCRIPTION

Anti-trauma protection in cross-linked expanded polyethylene coated on the visible side with scratch-resistant PVC and washable, meets all the requirements required by public bodies.
The best solution for protecting against accidental impacts against walls, fences, etc. both indoors and outdoors (does not absorb water).

CHARACTERISTICS

Material free from heavy metals and other dangerous substances, with excellent characteristics of waterproofness and lightness.
All the layers are joined and compacted by hot lamination, without the use of glues and pressed in a calender; this process allows the perfect union of the various layers which result as a single piece

DIMENSIONS

2000 x 1300 mm.- thickness 22mm.

COLOR

Blue

MATERIALS

Closed-cell cross-linked polyethylene foam coupled with PVC

DENSITY

30 kg/m³

FINISH

Faux leather

UV RESISTANCE

Good

SUITABLE SURFACES

Masonry, plasterboard, wood and metal walls both inside and outside.

SUITABLE FOR

Protect from accidental impacts against edges, walls, fences, etc.

WATERPROOFING

Resistant to liquids, basic acids and oils

INSTALLATION

Using polychloroprene glue to be spread with a roller both on the protection and on the wall

CERTIFICATIONS

ISO 9001:2015 Quality Certification issued by TOV Italia S.r.l.

TOLERANCES

Length and height +/- 2% - Thickness +/- 3% - Weight +/- 12%
